

PRODUCT LINES FOR THE FOOD INDUSTRY

THE IDEA BEHIND THE TECHNOLOGY

WHY?

Providing a simple and safe alternative to improved food safety compliance without compromising operational performance using a combination of hydrogen peroxide and surfactants with cleaning and antimicrobial properties that work effectively for improved food safety.

COMPOSITION

Hydrogen peroxide and edible organic ingredients from 100% vegetable origin and renewable sources.

BENEFITS

FOOD GRADE

Composed of safe ingredients (FDA GRAS-approved), edible and without hazardous by-products.

NATURAL CLEANER

Combines detergent and antimicrobial actions to perform the job of two products to simplify procedures.

ANTIMICROBIAL

Dual-action mechanism that eliminates more than 99.99% of the *E. coli* O157:H7, *Listeria monocytogenes* and *Salmonella enterica* pathogens without promoting antimicrobial resistance.

NO RINSE

Allergen-free, odourless, tasteless and colourless.

ECOLOGICAL

Rapidly biodegradable in biological compounds naturally present in the environment.

COMPLIANT

Letter of guarantee and Health Canada opinion available. Meets CFIA, Health Canada and HACCP guidelines.

SAFE

Simple handling of the concentrate without respiratory protection; does not require transport for hazardous materials.

TECHNOLOGY AVAILABLE UNDER LICENSE AGREEMENT FOR PRIVATE LABELS

PRODUCTS

USES

FOOD GRADE SANITIZER CLEANER CONCENTRATE – NO RINSE

This formula does the job of three products to simplify procedures for food safety. Designed to clean and sanitize surfaces and equipment before, during and after food preparation, its use improves sanitary compliance by providing protection against foodborne diseases caused by *E. coli*, *Listeria* and *Salmonella*. Safe for food contact, no rinse required.

ANTIMICROBIAL FRUIT & VEGETABLE TREATMENT CONCENTRATE – NO RINSE

With no odour or residual taste, this stable formula eliminates more than 99.99% of the pathogenic bacteria *E. coli*, *Listeria* and *Salmonella* in wash water, providing protection that limits the risk of foodborne illness. Combining cleaning and antimicrobial actions, its use helps to remove dirt, pesticides and microorganisms causing food spoilage. No rinse required. This formula can be combined with a low-concentration peracetic acid treatment to improve the spectrum of activity against norovirus.

FOOD GRADE ANTIMICROBIAL CLEANER READY TO USE – NO RINSE

This safe formula simplifies food safety operations by combining powerful cleaning and antimicrobial actions while being safe for direct contact with food. Does the job of two products in one easy step, safely and without rinse.

ANTIMICROBIAL CLEANING FOAM FOR HANDS READY TO USE – NO RINSE

This alcohol-free, skin-friendly formula provides quick and easy protection against the risk of foodborne infection and infection at any time. Safe and no rinse required, its use provides control of hand hygiene during food operations.

FOOD GRADE ANTIMICROBIAL CLEANING WIPES READY TO USE – COMPOSTABLE

This multipurpose formula for compostable wipes is gentle on the skin and safe in contact with food. It effectively cleans and sanitizes any surface or equipment that requires simple hygiene and sanitation control.

DISINFECTANT CLEANERS READY TO USE

Bactericidal, virucidal and fungicidal, this broad-spectrum disinfectant formula combines powerful plant-based detergent action with powerful antimicrobial action that cleans, disinfects and deodorizes hard surfaces in one easy step. **DIN 02487578**

DISINFECTANT WIPES READY TO USE – COMPOSTABLE

TECHNOLOGY PATENTED BY MICROBIO SOLUTIONS INC.

 : ONLY FDA GRAS-APPROVED INGREDIENTS

 : MEETS HEALTH CANADA REQUIREMENTS

 : VEGAN PRODUCT

 : MADE ONLY WITH FOOD QUALITY INGREDIENTS (FCC)

 : COMPOSTABLE
